

# Life Systems Services, Documentation Support

Creating Point-of-Care solutions that meet your needs

Providing support, solutions, and the power of knowledge to biomedical technicians and users.

## How documentation support will help

The Life Systems Services, documentation support services is one of the most powerful tools available to technicians and users. An extensive library of the most pertinent and current materials available for your GE Healthcare anesthesia equipment needs. It is always available, up to date, and there with the answers you need whenever you need them. Accessible via the web.

### Documentation support provides:

- **Documentation library** of the latest manuals available to help keep your shop in compliance, and your information the most current.
- **Technical bulletins** loaded with time saving tips and the latest knowledge available.
- Get the latest applicable **Software enhancement** tools available for diagnosing and servicing your equipment.
- **FAQs and tips.** Information you won't find anywhere else. Time saving tips and answers to common questions.
- **Information specific to your equipment needs.** No confusion about what applies to your facility's needs.
- **Secure access guaranteed with personalized account setup.** Individualized account security with personalized GE Healthcare logins granted and maintained.

## Get access today

Talk to your local GE Healthcare service representative to sign up. Your personalized account access will provide you with the latest information available on the machines you are authorized to service. Please note this service is only available to factory-trained personnel.

## Call for a customized estimate

**For more information** about this service, or Life Systems Service agreements, to identify a part, or to request on-site service, please call **1-800-345-2700** and speak with a customer service representative.

## Life Systems Services Value Promise

**Fast service response time** — With over 180 local Field Service Engineers, we ensure fast response times and local service.

**High technical competency** — Our engineers average 12 years service experience and remain up-to-date on new equipment and technology.

**Full parts coverage** — We only use GE parts. No substitutions. Our full parts coverage option maximizes equipment performance with predictable life cycle costs.

**Clinical and technical education** — Excellent support and training helps customers provide better patient care.

**A team of professionals who care** — When surveyed, 95% of Life Systems Services customers would recommend GE Healthcare service to a colleague.

At GE Healthcare Clinical Systems Services, we help you get to the point of care.

Every day 15 million patients around the world are touched by what we do.

Because of this, we know that every interaction counts, and that your reputation is your single biggest asset.

And at GE Healthcare, we thrive on transforming essential services into extraordinary outcomes for your people, processes and products.
